

Independant ownership is critical to the public's ability to keep our govenment honest. Media exposure and investigation into critical areas of public service enable the populace to respond with a single voice to issues that are not consistant with the public welfare. With a handful of media giants, it would be easy for the govenment to further taint news publications, and this environment would more closely resemble media environments that exist in communistic or theocratic areas of the world. The last thing that people want is a news media that resembles China's or N Korea's.

We patriots believe in a constitutionally based society that maintains are rights such as feedom of speach, and to maintain ourselves "one nation under GOD".
